DIGITAL BACKPACK

Designed for carrying digital cameras, media, lenses, accessories and a laptop computer. Fits through the airport security template to make your travels easier. Two compartments holds accessories lenses and your laptop computer. The front compartment has a removable insert with moveable dividers. There are two zippered pouches to accommodate cameras

The Digital BackPack differs from other similar products in that the case can stand straight up making equipment easily accessible. The front of the BackPack sports an adjustable laced bungee cord to stuff your rain jacket. Plus there is an outside zippered pocket where you can keep pens, small tools, batteries, and small dittys.

Fully loaded the Digital BackPack is comfortable to wear with the ergonomic harness system and back breathable mesh fabric. The bottom is abrasion and water resistant so it can be set down in wet areas. The BackPack is made from the most durable black ballistics. Built to last as many trips as you can give it.
