These work together. . .
 MultiMate 1420 (MM1420)
 Shoulder Strap (A8010)
 Bandelero (A8013)
 Clear Bag (GS402)
 Meter Wide (GS302)

**MULTI FORMAT 1420**

The Multi Format 1420 is the original of the Multi Format cases. It used to be the maximum size that you were allowed to carry on board most airlines. It still works and fits the aircraft but with the new carry on restrictions, it would be best to check before you head to the airport.

You will find this case ideal to carry a small strobe systems or just a whole bunch of medium format and/or 35mm camera equipment. If you are good at packing you can trim your dividers down and make a shelf to carry your computer on top of lenses and bodies laying flat.

It now comes with a special "Z Pocket" design that allows the new Multi Z Pocket to be attached. Another addition to this case are two nifty stash pockets on the inside lid. Great for instruction manuals, extra flash cards, a pocket reader, a fire wire cable or two and some CD's.
