**MULTI FORMAT 1629**

Our largest airline checking standard. Great for lights, small stands, soft boxes and accessories. A complete location lighting kit can be assembled in this case. Let your imagination be the guide. Makes no difference if you are using strobes, tungsten or HMI. It can handle them all with ease.

The customizable divider system allows you to mix and match light sizes to suit your style. Carry a set of head extensions, grids, barn doors and gels, boxes, umbrellas and small reflectors with ease. It could easily become the one case you can't do without. You can also look at our RMF 1629, it is the same but is the rolling version.
