 300 mm Case (Z300)
 400 mm Case (Z400)
 600mm Case (Z600)

LONG LENS SHIPPING

With the Z1309 you can ship your long lense with security knowing it will arrive safely. The Z1309 is designed to hold one lense up to a 600mm F/4. With this design you can reverse the hoods and pack into a Long Lens Soft Side, then put the Soft Side(s) into the shipping case.

(Particularly if you are headed to Buffalo in December). The case also works well if you need to mix and match lots of extra bodies and lenses for setting up remotes for diving, racing or special applications. It will swallow a lot of gear.
