 400 mm Case (Z400)
 600mm Case (Z600)

**LONG LENS SHIPPING**

With either the Z1328 or the Z1309 you can ship your long lenses with security knowing they will arrive safely. The Z1328 is designed to hold two lenses up to a 600mm F/4. With this design you can pack out in a Long Lens Soft Side, then put the Soft Side(s) into the shipping case. Double the protection.

If you are on "sports" or wildlife adventure, you will have room left over to pack a few necessities. The case also works well if you need to mix and match lots of extra bodies and lenses for setting up projects.
